

## Thinking and Reasoning Life Skills Domain Integration Activity

### Subject:

### Definition

Thinking and reasoning are the use of cognitive and logical skills or strategies that increase the probability of a desirable outcome. Thinking and reasoning are intellectually disciplined processes of actively and skillfully conceptualizing, accessing, applying, analyzing, synthesizing, and/or evaluating information gathered from, or generated by, observation, experience, reflection, reasoning, or communication, as a guide to belief and action.

### Rationale

Thinking and reasoning skills enable students to make logical choices in their lives. Students will become independent thinkers, able to apply thinking and reasoning skills strategically to solve new problems.

### Indicators

1. Acquires, organizes, and evaluates information to make informed decisions

Core Standard/Objective:

Activity:

Assessment:

2. Integrates new learning with existing knowledge and experiences

Core Standard/Objective:
